EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Leland Wiesner on 01 March 2004.

The application has been amended as follows:

-Please cancel claims 8 and 9 without prejudice.

-Please re-write the following claims as follows:

7. A printer having a capability to ration its ink supply in response to the ink supply level, the printer comprising:

a printing device that prints a received print job containing metadata in which one or more of the sections of print content are assigned priority levels according to metadata; and

a controller, coupled to the printing device, that controls the printing device in response to the print job, the controller having means for instructing the printing device to print each section of print content in an ink-rationing mode in response to both the ink supply level and the priority level associated with that section of print content.

13. A printer having a capability to ration its ink supply in response to the ink supply level, the printer comprising:

a printing device that prints a received print job on print media, the print job comprising one or more sections of print content identified by metadata in which one or more of the sections of print content are assigned priority level; and

a controller, coupled to the printing device, that controls the printing device in response to the print job, the controller comprising means for instructing the printing device to print a first section of content in an ink-rationing mode in response to at least one of the ink supply level and the priority level assigned to the first section by the metadata.

14. A method for generating a print document that can be printed in an ink rationing printer, the method comprising the steps of:

generating content that is comprised one or more sections of print content;

assigning a print priority level to each section of the at least one section of the content; and

generating the print document comprising the one or more sections of print content, and metadata in which at least one of the one or more sections of print content is assigned a priority level.

17. In a printer comprising an ink supply for printing content on print media, the method comprising the steps of:

receiving a print job comprising one or more sections of print content identified by metadata in which one or more of the sections of print content are assigned priority levels according to the metadata;

parsing the metadata associated with the one or more sections of print content prior to printing the print job;

if the print content is assigned a priority level, printing the print content in a print mode that is appropriate for the priority level; and

if the print content is not assigned a priority level, printing the print content using a normal print mode.

19. A printer having a capability to ration its ink supply, the printer comprising:

a printing device that prints a received print job on print media, the print job comprising one or more sections of print content identified by metadata in which one or more of the sections of print content are assigned priority levels according to the metadata; and

a controller, coupled to the printing device, that controls the printing device in response to the print job, the controller comprising:

means for parsing the print job to determine the print priority level of each section of content according to the metadata; and

means for instructing the printing device to print a first section of content in an ink-rationing mode in response to at least one of the ink supply level and the first section priority level.

21. In a system comprising a computer coupled to a printer, the printer having an ink supply for printing content on print media and capable of:

receiving a print job comprising one or more sections of print content identified by metadata in which one or more of the sections of print content are assigned priority levels according to the metadata;

parsing the print content to determine at least one print priority level for each section of the at least one section according to the metadata;

generating a print job in response to the content and the at least one print priority level;

transmitting the print job to the printer; and

printing the print job in response to the content and the at least one print priority level.

Allowable Subject Matter

2. Claims 1 and 3-7 and 10-24 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1, 17 and 21 is the inclusion of the step of receiving a print job comprising one or more sections of print content identified by metadata in which one or more of the sections of print content are assigned priority levels according to the metadata. It is these steps found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claim 14 is the inclusion of the step of generating the print document comprising the one or more sections of print content, and metadata in which at least one of the sections of print content is assigned a priority

level. It is these steps found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 7, 13 and 19 is the inclusion of the limitation of a printing device that prints a received print job containing one or more sections of print content identified by metadata in which one or more of the sections of print content are assigned priority levels according to the metadata. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
